

# Rochester Electronics Manufactured Components

Rochester branded components are manufactured using either die/wafers purchased from the original suppliers or Rochester wafers recreated from the original IP. All recreations are done with the approval of the OCM.

Parts are tested using original factory test programs or Rochester developed test solutions to guarantee product meets or exceed the OCM data sheet.

## **Quality Overview**

- ISO-9001
- AS9120 certification
- Qualified Manufacturers List (QML) MIL-PRF-35835
  - Class Q Military
  - Class V Space Level
- Qualified Suppliers List of Distributors (QSLD)
- Rochester is a critical supplier to DLA and meets all industry and DLA standards.

Rochester Electronics, LLC is committed to supplying products that satisfy customer expectations for quality and are equal to those originally supplied by industry manufacturers.

The original manufacturer's datasheet accompanying this document reflects the performance and specifications of the Rochester manufactured version of this device. Rochester Electronics guarantees the performance of its semiconductor products to the original OEM specifications. 'Typical' values are for reference purposes only. Certain minimum or maximum ratings may be based on product characterization, design, simulation, or sample testing.

April 1988 Revised October 2000

#### 74F378

## Parallel D-Type Register with Enable

#### **General Description**

The 74F378 is a 6-bit register with a buffered common Enable. This device is similar to the 74F174, but with common Enable rather than common Master Reset.

#### **Features**

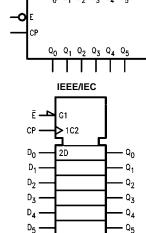

- 6-bit high-speed parallel register
- Positive edge-triggered D-type inputs
- Fully buffered common clock and enable inputs
- Input clamp diodes limit high-speed termination effects
- Full TTL and CMOS compatible

## **Ordering Code:**

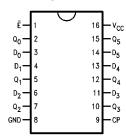

| Order Number | Package Number | Package Description   |
|--------------|----------------|---|
| 74F378SC     | M16A           | 16-Lead Small Outline Integrated Circuit (SOIC), JEDEC MS-012, 0.150 Narrow |
| 74F378SJ     | M16D           | 16-Lead Small Outline Package (SOP), EIAJ TYPE II, 5.3mm Wide               |
| 74F378PC     | N16E           | 16-Lead Plastic Dual-In-Line Package (PDIP), JEDEC MS-001, 0.300 Wide       |

Devices also available in Tape and Reel. Specify by appending the suffix letter "X" to the ordering code.

#### **Functional Description**

The 74F378 consists of six edge-triggered D-type flip-flops with individual D inputs and Q inputs. The Clock (CP) and Enable  $(\overline{E})$  inputs are common to all flip-flops.

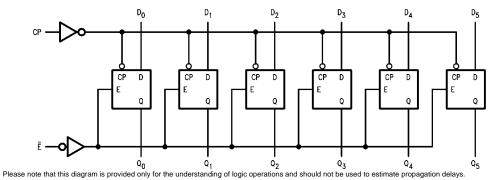

When the  $\overline{E}$  input is LOW, new data is entered into the register on the LOW-to-HIGH transition of the CP input. When the  $\overline{E}$  input is HIGH the register will retain the present data independent of the CP input.

#### **Truth Table**

|   |  | Output |                |                |
|---|--|--------|----------------|----------------|

<sup>∠ =</sup> LOW-to-HIGH Clock Transition

#### **Absolute Maximum Ratings**(Note 1)

-65°C to +150°C Storage Temperature Ambient Temperature under Bias -55°C to +125°C

Junction Temperature under Bias  $-55^{\circ}C$  to  $+150^{\circ}C$ V<sub>CC</sub> Pin Potential to Ground Pin -0.5V to +7.0V

Input Voltage (Note 2) -0.5V to +7.0VInput Current (Note 2) -30 mA to +5.0 mA

Voltage Applied to Output

in HIGH State (with  $V_{CC} = 0V$ )

Standard Output -0.5V to  $V_{CC}$ 

3-STATE Output -0.5V to +5.5V

Current Applied to Output

in LOW State (Max) twice the rated I<sub>OL</sub> (mA)

#### **Recommended Operating Conditions**

Free Air Ambient Temperature 0°C to +70°C Supply Voltage +4.5V to +5.5V

Note 1: Absolute maximum ratings are values beyond which the device may be damaged or have its useful life impaired. Functional operation under these conditions is not implied.

Note 2: Either voltage limit or current limit is sufficient to protect inputs.

#### LIFE SUPPORT POLICY

FAIRCHILD'S PRODUCTS ARE NOT AUTHORIZED FOR USE AS CRITICAL COMPONENTS IN LIFE SUPPORT DEVICES OR SYSTEMS WITHOUT THE EXPRESS WRITTEN APPROVAL OF THE PRESIDENT OF FAIRCHILD SEMICONDUCTOR CORPORATION. As used herein:

- Life support devices or systems are devices or systems which, (a) are intended for surgical implant into the body, or (b) support or sustain life, and (c) whose failure to perform when properly used in accordance with instructions for use provided in the labeling, can be reasonably expected to result in a significant injury to the user.
- A critical component in any component of a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.
