### Features

- Replaces DP-650, DP-652 and DP-654 meters
- Connects directly to existing wiring
- Available in three input ranges:  $\pm 200\text{mV}$ ,  $\pm 2\text{V}$  and  $\pm 20\text{V}$
- Low power consumption
- Wider operating temperature range (0 to  $+60^\circ\text{C}$ )
- Rugged, epoxy-encapsulated plastic packages
- Large (0.4"/10.2mm) LCD displays
- Made in the USA!

DATEL's new DMS-3019X Series, 3½ Digit, LCD Display, Digital Panel Voltmeters provide DP-650 users with a superior-quality alternate source. The DMS-3019X Series input/output connector is pin-compatible with nearly all DP-650 applications. Only minor sheet-metal modifications are needed to attain all the advantages offered by the DMS-3019X Series digital voltmeters.

Three differential, high-impedance, input voltage ranges are available:  $\pm 200\text{mV}$  (DMS-30193),  $\pm 2\text{V}$  (DMS-30194) and  $\pm 20\text{V}$  (DMS-30195). Provisions are also included for the addition of custom input-scaling resistors—a feature found only on DMS-3019X meters. Autozero calibration, autopolarity changeover and a factory-calibrated ultra-stable reference circuit are standard. A reliable, epoxy-encapsulated DMS-30LCD digital voltmeter, with large (0.4"/10.2mm) LCD digits, is used in all three models. All internal and external connections are 100% soldered—no elastomeric connectors are used.

The DMS-3019X Series offers many noteworthy improvements over its competitors: wider operating temperature range, lower power consumption and higher input impedance, to name a few. And, most importantly, all DATEL digital panel meters are designed and manufactured in the USA!
