## 1 OVERVIEW

I94124\_NAU88C22\_MB board is the specific development tool for I94100 series with NAU88C22 to support MIC, AUXIN and headphone on one board. User can use it to develop and verify the audio application program easily.

To support more microphone, it can connect with I94124\_MB\_NAU85L40\_NR (NAU85L40+AMIC) and I94124\_MB\_DMIC (DMIC Daughter board). The connection is as the below figure.

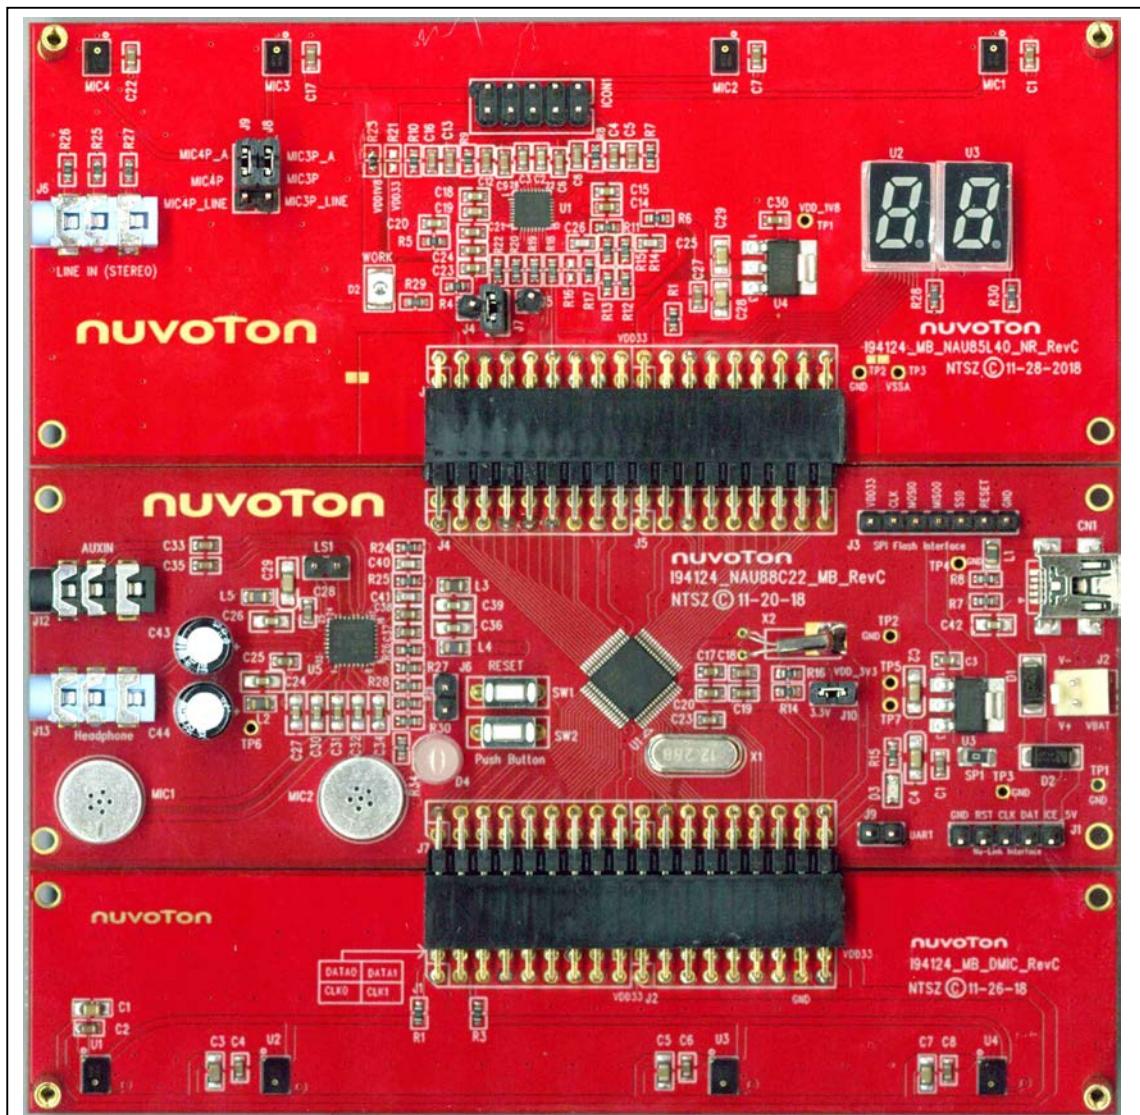

Figure 1.1-1 I94124\_NAU88C22\_MB with AMIC/DMIC extension boards

### **1.1 I94124\_NAU88C22\_MB Features**

- Nu-Link ICE interface connector.
- Audio board extension interface connectors.
- USB 1.1 Full-Speed Device.
- Two push-buttons: one is for reset and the other one is for user-defined.
- Two LEDs: one is for power indication, the other one is for user-defined.
- Two MIC and two AUXIN input through NAU88C22.
- Speaker and headphone output through NAU88C22.

### **1.2 I94124\_MB\_NAU85L40\_NR Features**

- Maximum 4 channel AMIC supported
- Stereo line-in with 2 MIC channels
- Two sets of 7-segments LED display by IO control

### **1.3 I94124\_MB\_DMIC Features**

- Maximum 4 channel DMIC channel connection with I94124

## 2 I94124\_NAU88C22\_MB BOARD OVERVIEW

### 2.1 Front View

Figure 2.1-1 shows the main components and connectors from the front side of EVB-I94124ADI board.

The following lists components and connectors from the front view:

- Target Chip: I94124ADI (U1)
- Nu-Link interface (J1)
- I94124ADI IO extension interface connectors (J4, J5, J6 and J7)
- USB: USB connector (CN1)
- Push-buttons (SW1, SW2)
- LED: POWER LED (D3, green), User Application LED (D4, red)
- Power connectors (J1, J2, CN1)

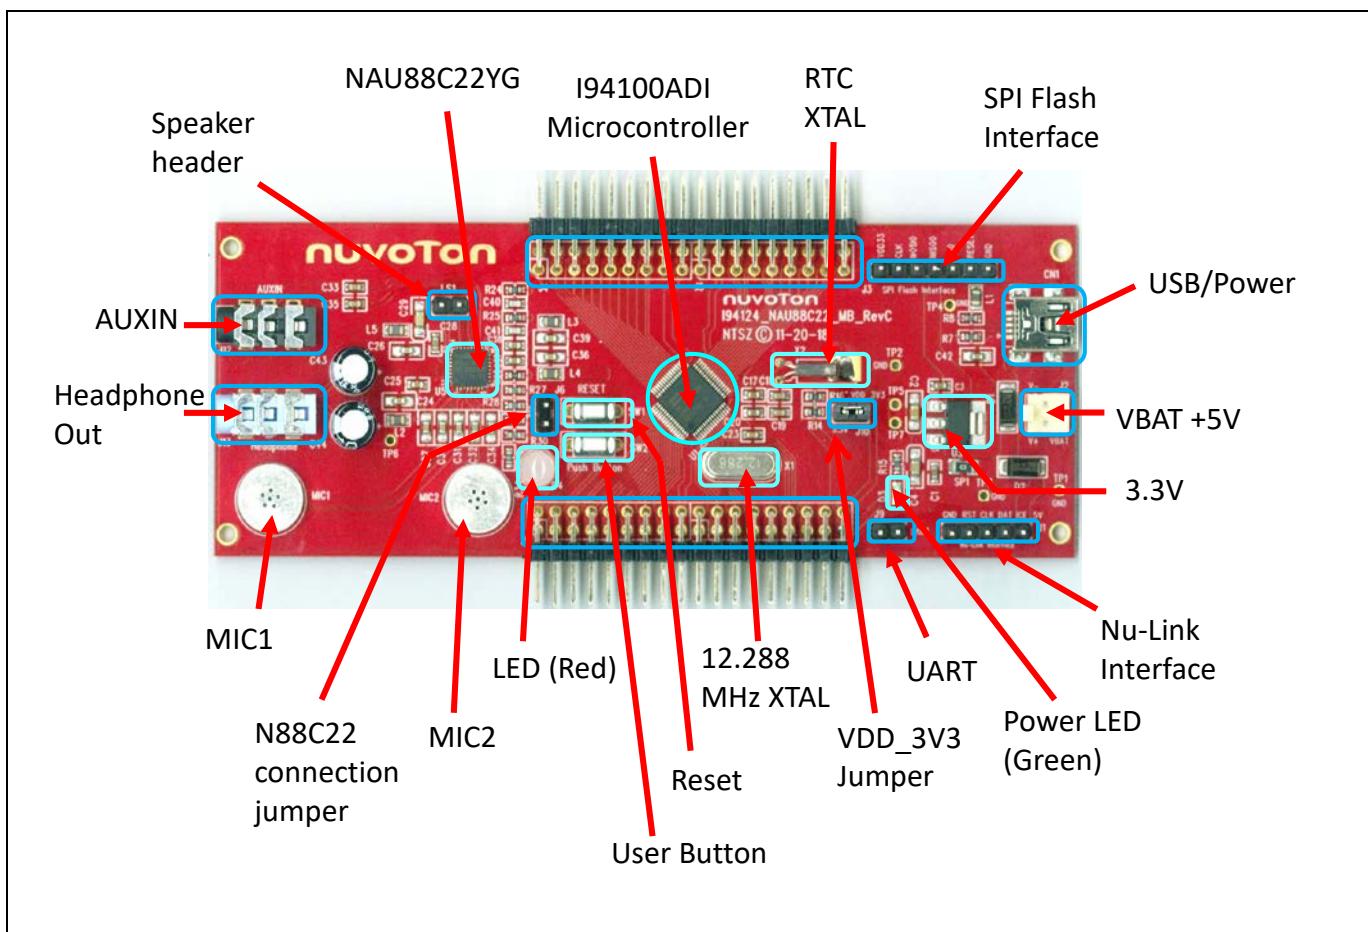

Figure 2.1-1 Front View of I94124\_NAU88C22\_MB

## 2.2 Rear View

Figure 2.2-1 shows the rear side of I94124\_NAU88C22\_MB board.

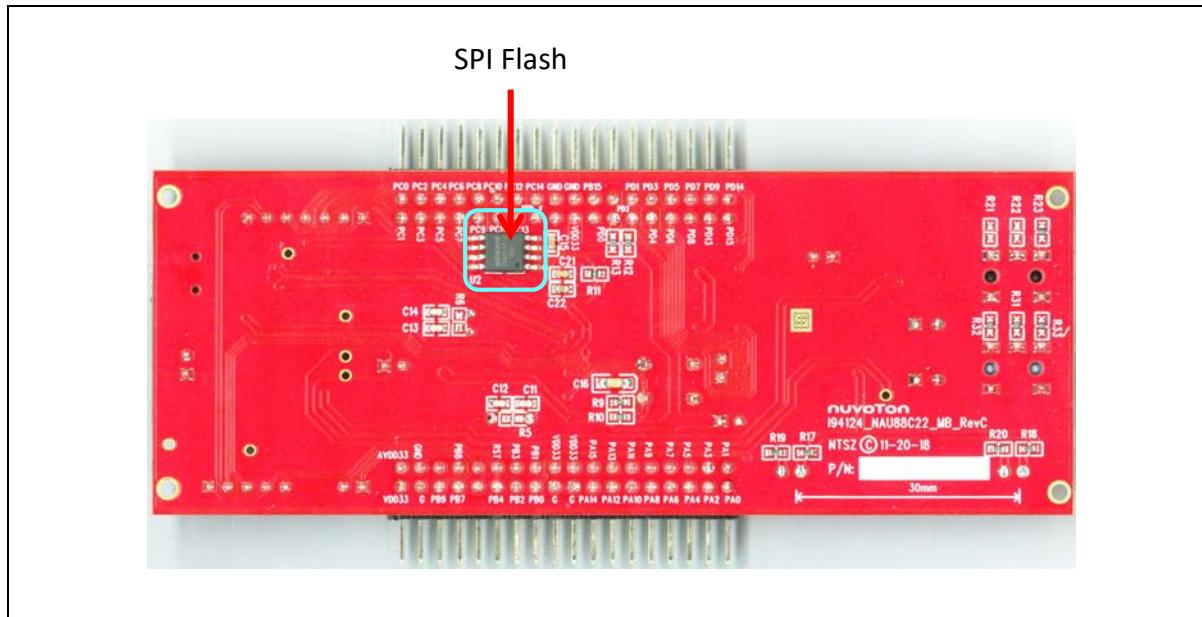

Figure 2.2-1 Rear View of I94124\_NAU88C22\_MB

### 2.3 Power System

The I94124\_NAU88C22\_MB supplied by an external 5V USB power connected to Micro USB connectors (CN1 or J1) or 4.5 Volt to 5.0 Volt DC power supply connected to VCC Pin Header (J2). On-board reversed 2 current protection diodes will ensure power can be provided through both USB connectors at the same time safely. If the board is powered from USB connector, it is not recommended to apply an additional DC power supply to VCC pin header (J2), because there is no protection against reverse current into the DC power supply. Figure 2.3-1 shows I94124\_NAU88C22\_MB power supply concept.

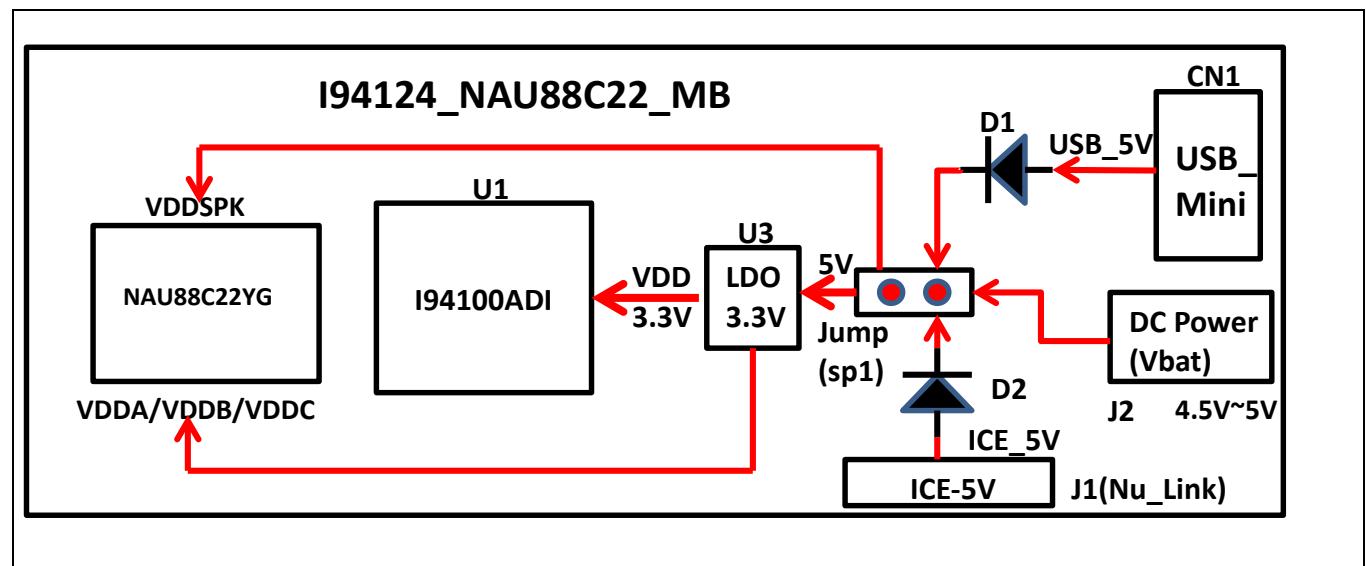

Figure 2.3-1 Power Supply Block Diagram

## 2.4 Pin Assignment for IO Extension Connectors

Most of IO pins of the I94124ADI are pin out to the connectors J4, J5, J7 and J8 for extension. The Figure 2.4-1 shows the I94124ADI extended IO pins on connectors.

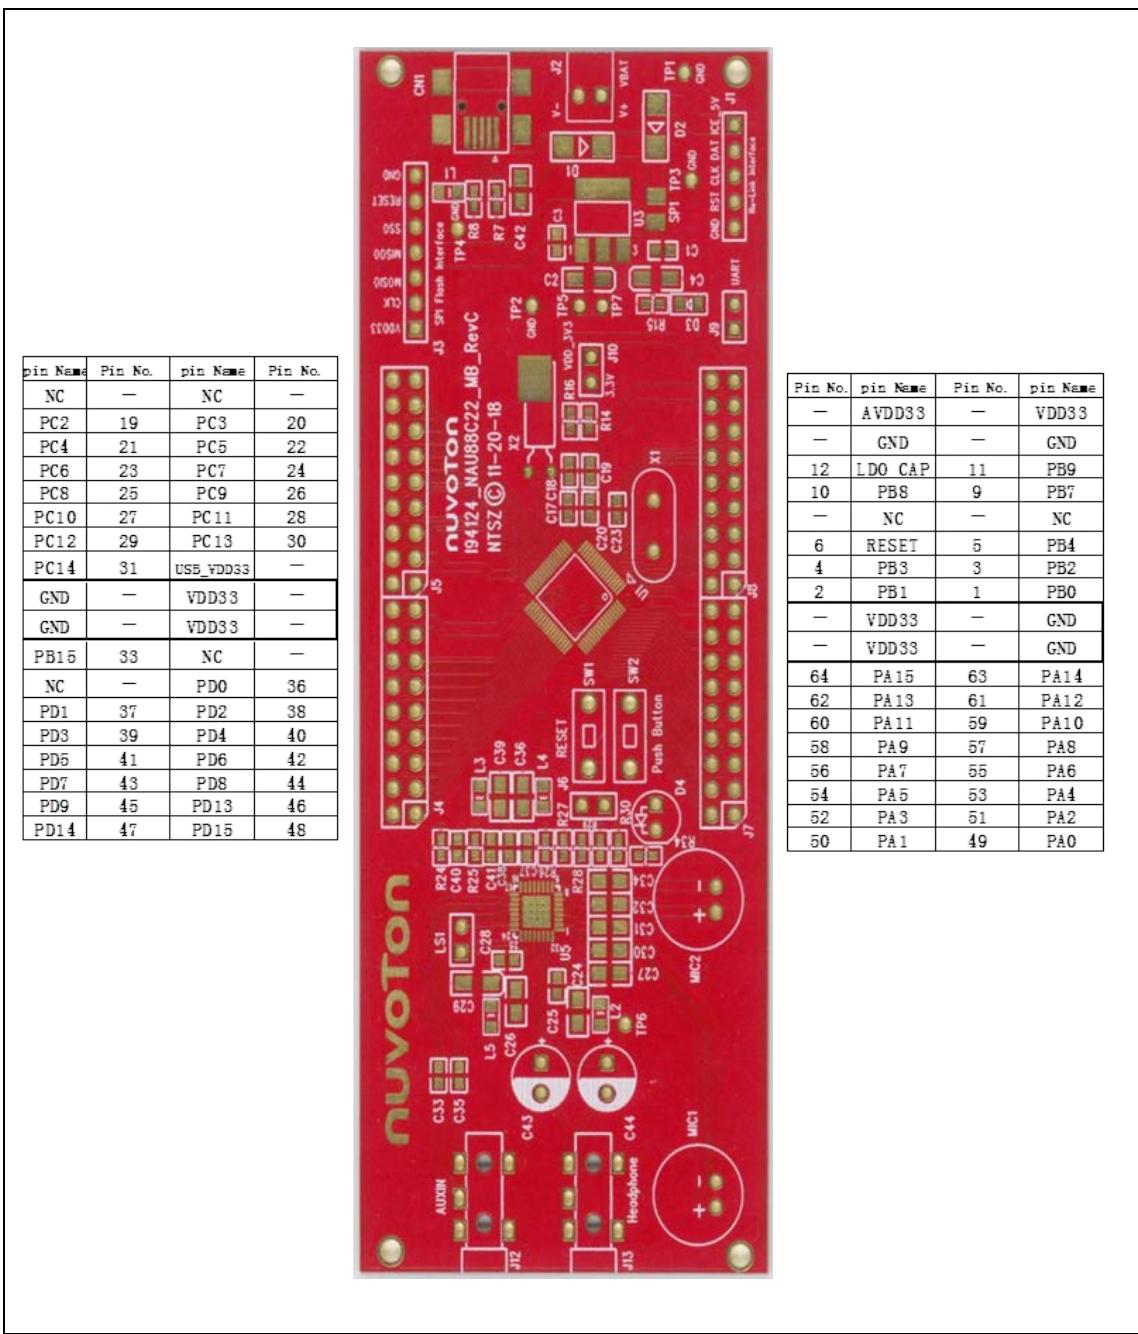

Figure 2.4-1 I94124ADI IO Extension Connectors

## 2.5 System Configuration

### 2.5.1 Power Source

- **J1:** NuLink interface.
- **CN1:** USB interface with VBUS power.
- **J2:** power jack for DC IN(VBAT), requires 4.5V~5.0V.

Power Source	Component	Comment
ICE_5V	J1	Power pin on J1 for the power from Nu-Link (this board requires 5V)
USB_5V	CN1	Power pin on CN1 to supply 5V power from PC Host VBUS.
DC IN(VBAT)	J2	Power pin of J2 for DC or battery power input

### 2.5.2 3.3V LDO

- **U3:** The voltage regular converts the 5V source to 3.3V and supplies it to I94100 and NAU88C22 on board.

Power Source	Component	Comment
VDD_3V3	U3	LDO output 3.3V to supply I94100ADI platform board.

### 2.5.3 USB Connector

- **CN1:** USB interface connector.

### 2.5.4 IO Extension Connectors

- **J4, J5, J7 and J8:** IO extension connectors.

### 2.5.5 Push-Buttons

- **SW1:** Reset button to reset-I94100ADI.
- **SW2:** Button for user definition.

### 2.5.6 LED

- **D3:** Indicates-I94124\_NAU88C22\_MB board powered up.
- **D4:** For user application.

### 2.5.7 Power Connectors

- **SP1:** Jumper for providing the power from J1/J2/CN1 to LDO.

### 2.5.8 Clock Source

- **X1:** 12.288 MHz crystal.
- **X2:** 32.768 kHz crystal.

### 2.5.9 Nu-Link Interface

- **J1:** Nu-Link interface for I94124.

### 2.5.10 SPI Flash interface

- **J3:** SPI Flash Interface.

### 2.5.11 Others

- **J9:** UART Interface of I94124ADI
- **J6:** Jumper to allow I2S data out from NAU88C22 to I94124.
- **LS1:** NAU88C22 Speaker out.
- **J12:** AUXIN of NAU88C22YG.
- **J13:** NAU88C22YG headphone out.

## 2.6 Components Placement

and show the front and rear placement of I94124\_NAU88C22\_MB board.

**4 REVISION HISTORY**

Date	Revision	Description
2020.07.30	1.0	1. Initially issued.

### Important Notice

Nuvoton Products are neither intended nor warranted for usage in systems or equipment, any malfunction or failure of which may cause loss of human life, bodily injury or severe property damage. Such applications are deemed, "Insecure Usage".

Insecure usage includes, but is not limited to: equipment for surgical implementation, atomic energy control instruments, airplane or spaceship instruments, the control or operation of dynamic, brake or safety systems designed for vehicular use, traffic signal instruments, all types of safety devices, and other applications intended to support or sustain life.

All Insecure Usage shall be made at customer's risk, and in the event that third parties lay claims to Nuvoton as a result of customer's Insecure Usage, customer shall indemnify the damages and liabilities thus incurred by Nuvoton.
