

THICK FILM RESISTORS

Pick of the Chips D/CRCW e3

Surface-Mount Thick Film Chip Resistors Engineering Design Kit

KEY BENEFITS

- Convenient to use by engineers
- Aids in the design work process
- AEC-Q200 qualified
- 0402, 0603, 0805, and 1206 case sizes
- Feature E96 series resistance values from 10 Ω to 1 M Ω (every fourth value) in addition to a 0 Ω jumper

APPLICATIONS

- Automotive
- Industrial equipment
- Telecom infrastructure
- Consumer
- Computer

RESOURCES

THICK FILM RESISTORS

Pick of the Chips D/CRCW e3

Thick Film Chip Resistors Engineering Design Kit, Surface Mount

FEATURES

- The commercial-off-the-shelf Thick Film Chip Resistors are now conveniently taped in strips, individually labeled and packaged in new engineering design kits
- The kits contain 1/4 E96 series
- The values specified $\pm 1\%$ tolerance and ± 100 ppm/K
- Compliant to RoHS Directive 2002/95/EC
- Halogen-free according to IEC 61249-2-21 definition
- AEC-Q200 qualified
- For further information refer to datasheet D/CRCW e3: www.vishay.com/doc?20035
