Humidity and Temperature Sensor
for Demanding Climate Control

EE210

Humidity and Temperature Sensor for Demanding Climate Control

The EE210 humidity (RH) and temperature (T) sensor is designed to meet the highest requirements in demanding climate control applications. Besides the accurate measurement of RH and T EE210 calculates various RH related parameters such as dew point temperature, absolute humidity and mixing ratio.

Outstanding Measurement Performance

Excellent performance of EE210 in polluted or aggressive environment is ensured by the encapsulated measurement electronics inside the sensing probe and the long-term stable E+E sensing element with proprietary coating.

Analogue, Digital Outputs and Display

All measured and calculated values are available on the BACnet MS/TP or Modbus RTU interface, two of them on the analogue voltage or current outputs, while up to three values can be shown simultaneously on the optional display.

Versatility

EE210 is available for wall or duct mount, with remote probe, as well as an outdoor version. The IP65/NEMA 4X enclosure minimizes installation costs and provides outstanding protection against contamination and condensation.

Easy Configuration and Adjustment

With an optional USB configuration adapter, the user can set the RS485 interface parameters, the output scaling and perform one or two point adjustment for RH and T.

EE210 duct mount (type T2)

EE210 with remote probe (type T3)

EE210 outdoor with radiation shield (type T13)

EE210 wall mount (type T1)

Features

BACnet is a registered trademark of ASHRAE. ASHRAE does not endorse, approve or test products for compliance with ASHRAE standards. Compliance of listed products to the requirements of ASHRAE Standard 135 is the responsibility of BACnet International (BI). BTL is a registered trademark of BI.

Display

- Selectable display layout
- Measurands freely selectable
- Backlight optional

Knockout for 1/2" conduit fitting (US)

External mounting holes

- Mounting with closed cover
- Electronics protected against construction site pollution
- Easy and fast mounting

Enclosure

- Protection rating IP65/NEMA 4X
- Type T13 compatible with radiation shield H010501

Smooth cover surface

- No accumulation of dust in protruding edges

Electronics on the underside of the PCB

- Optimum protection against mechanical damage during installation

Bayonet screws

- Open / close with a 1/4 rotation

Cast electronics

- Mechanical protection
- Condensation-resistant

E+E RH and T Sensing Element

- Outstanding long-term stability
- Protected solder pads
- Tested according to automotive standard AEC-Q200

Watertight cable outlet

Inspection certificate

according DIN EN 10204-3.1

Features

Protective Sensor Coating

The E+E proprietary sensor coating is a protective layer applied to the active surface of the sensing element. The coating substantially extends sensor lifetime and ensures optimal measurement performance in corrosive environment (salts, off-shore applications). Additionally, it improves the sensors' long term stability in dusty, dirty or oily applications by preventing stray impedance caused by deposits on the active sensor surface.
